## NATCAN Newsletter, September 2024

### Webinar: Exploring Key Findings from the 2024 SotN Reports

Monday 14 October 2024, 14:00 - 16:30

We will be hosting an online webinar to discuss the key findings from the first State of the Nation (SotN) reports for the six new national audits in kidney, ovarian, pancreatic and breast cancer (primary and metastatic disease) and non-Hodgkin Lymphoma. The webinar will feature presentations from our clinical fellows.

A formal invite and further details about the event will follow in the next couple of weeks. For now, please save the date.

We look forward to welcoming you to NATCAN's first centre-level webinar.

### Quality Improvement (QI) Plans

- ✓ In 2023, a scoping exercise identified 5 key QI goals.
- ✓ During 2024, teams worked with stakeholders to develop 10 performance indicators to monitor progress towards these QI goals, aiming for the indicators to be measurable, actionable and improvable.
- ✓ The new QI Plans are now published across both new and established cancer audits in metastatic breast, bowel, kidney, prostate, non-Hodgkin lymphoma, ovarian, oesophago-gastric, pancreatic and primary breast cancer.
- ✓ The QI goals for the lung cancer audit were defined in 2022 and are currently under review.

### State of the Nation Reports

The State of the Nation reports for the six new audits will be published on 12 September.

The reports will provide a national picture of care and highlight variation between organisations, with targeted recommendations to drive quality improvement.
